The image shows a digital interface for converting fractions to decimals. At the top, the title "THE DECIFRACTA" is displayed in blue. Below it, the fraction $\frac{5}{6}$ is shown with "Numerator" above the 5 and "Denominator" below the 6. Red arrows point from the fraction towards the result. To the right, the text "Decimal equivalent" is above a large cyan display box showing the result "0.833333".

Below the main display, there are two sections:

- QUICK FRACTIONS - Click**: A row of five buttons showing common fractions: $\frac{1}{1}$, $\frac{10}{10}$, $\frac{25}{25}$, $\frac{50}{50}$, and $\frac{100}{100}$.
- CREATE YOUR OWN FR**: A section with two input boxes containing the numbers 5 and 6, a horizontal line between them, and a "CALCULATE" button. Text to the right says "Enter your own Numerator and Denominator".

At the bottom, there are two buttons: "EXIT" and "IDEAS".

Γράφοντας ένα δεκαδικό κλάσμα και πατώντας "**calculate**" μπορείτε να δείτε πώς γράφεται με τη μορφή δεκαδικού αριθμού.
